Award full 1 mark only for correct and complete answer. No partial marking.

1. **Byte**
2. **1024 bytes**
3. **Automated Teller Machine**
4. **Around 3000 BC** *(accept: ancient times / ~2500–3000 BC)*
5. **Intel 4004**
6. **Devices used to store data and information.**
7. **Linux, LibreOffice** *(accept: any valid open-source software)*
8. **Basic Input Output System**
9. **E-learning software / Educational video / Multimedia CD** *(any one)*
10. **Decimal Number System** *(or Hindu-Arabic Number System)*

Section B: Short Answer (Any 7 × 4 = 28)
General Rubrics (4 Marks Questions):

- 4 marks = Complete answer with explanation
- 3 marks = Minor missing point / partial explanation
- 2 marks = Basic idea but incomplete
- 1 mark = Very little relevant content

1. Characteristics of Computer
Any four (1×4=4) + Explanation (extra clarity included)

- Speed
- Accuracy
- Storage
- Diligence
- Versatility

Explanation (any one):
Example: *Speed – Computer performs millions of calculations per second.*

2. Preventive Measures from Virus (2+2=4)

- Install antivirus software
- Avoid unknown USB drives
- Do not download from unsafe sites
- Keep system updated

3. Fifth Generation Expectations (Any 4 ×1=4)

- Artificial Intelligence
- Natural language processing
- Robotics
- Expert systems
- Parallel processing

4. Compiler vs Interpreter (2+2=4)

Compiler	**Interpreter**
Translates whole program at once	Translates line by line
Faster execution	Slower execution
Errors shown after compilation	Errors shown line by line

(Any 2 valid differences = full marks)

5. Booting (2+2=4)

- **Booting:** Process of starting a computer
- **Types:**
    - Cold Booting
    - Warm Booting

6. Software Examples (1×4=4)

- **Sound Editing:** Audacity, WavePad
- **Video Editing:** Adobe Premiere Pro, Filmora

7. Binary Addition (4 marks total)

```
  10100
+ 01101
  ---------
  100001
```

Step/process = 2 marks
Final answer = 2 marks

8. Programming Language (2+2=4)

- Definition: Language used to write instructions for computers
- Types:
    - Low-level
    - High-level

Section C: Long Answer (Any 2 × 6 = 12)
General Rubrics (6 Marks Questions):

- 6 = Complete explanation of all points
- 5 = One minor missing
- 4 = Basic explanation but incomplete
- 2–3 = Very limited understanding

. Important Terms (6 marks → 1 mark each)

- Data: Raw facts and figures
- Data Processing: Converting data into meaningful form
- Information: Processed data
- Program: Set of instructions
- Hardware: Physical parts of computer
- Software: Programs that run on computer

2. Hardware Devices (6 marks)
Types (with explanation):

- Input Devices (Keyboard, Mouse)
- Output Devices (Monitor, Printer)
- Storage Devices (Hard disk, Pen drive)
- Processing Devices (CPU)

Marking:

- Types = 4 marks
- Explanation/examples = 2 marks

3. Computer Network (6 marks)

- Definition: Connection of multiple computers to share data

Types:

- LAN (Local Area Network)
- MAN (Metropolitan Area Network)
- WAN (Wide Area Network)

Marking:

- Definition = 2 marks
- Types + explanation = 4 marks
